

What Can I Learn?

The Bachelor of Science in English and Technical Communication is a “choose your own adventure story,” designed to give students the flexibility to pursue their own interests while they develop the skills necessary to become innovative, effective communicators in rapidly evolving career fields.

By selecting their own unique combination of core and supplementary modules, students in the English and Technical Communication program can become communication experts in the field of their choice. The structured overlap of core courses in English and Technical Communication exploration, theory, research, and implementation gives students a highly adaptable skill set, while degree electives allow students to specialize in communication within specific industries or knowledge domains.

English and Technical Communication

Missouri University of Science and Technology

236 Humanities-Social Sciences, 500 W. 14th St.,
Rolla, MO 65409

Core Modules

Literature

Enhance critical thinking through the study of literature, honing skills essential for professions that demand effective communication within human narratives.

Linguistics

Engage with the scientific study of language, exploring structure, usage, and evolution while developing linguistic strategies for various communicative contexts

Technical Communication

Develop skills to ethically and effectively convey complex information, preparing for diverse careers by prioritizing user-focused communication.

Supplementary Modules

Supplementary modules are three-course sequences added on to core modules to increase specialization and improve career marketability. Some available core modules include:

- Marketing management
- Creative writing
- Popular genres in literature
- Workplace communication
- Game studies
- Literature of contemporary issues

Choose from more than 25 available options, or create your own in consultation with your advisor
